

# **KAI INC**

Your Idea. Our software.

"KAI are highly ambitious experts. It was a pleasure working with them."

**Arnim Schneider** *Project Manager, Willendorff Technologies GmbH*

"I really enjoyed working with KAI. Work was excellent. I recommend KAI to anyone looking for quality programming/web development work. Looking forward to working with KAI in the future."

*Creator, ZDM Designs Branding* **Zechariah Manning**

"Great project, will work again with KAI"

**JOSH SHINDLER** *Co-Founder, Maven*

Projects

KAI INC was founded in 1994. Today it has over a hundred employees in Europe, UK, and the US, providing technical support, software development, and IT consulting.

Our biggest focus is in software development for universities, private companies, government entities, and mining and geologic infrastructure companies who all make use of our web, cloud, mobile, and desktop software development services and products.

We have been working in the UK and collaborating with our partners in Switzerland, Ukraine and Poland for over 15 years. Two years ago we opened our office in USA and already have 18 implemented projects from our clients in San Diego, San-Francisco and New York.

## ✓ Software development

We use the most effective platforms in order to develop new solution for every software. Only this approach allows us to keep up with ever changing technology.

## ✓ Website

Our team of developers will be working with your company to create a personalized and exclusive product that will satisfy the specific demands of your business.

## ✓ Cloud-based servers

We perform virtualization of servers using Amazon EC2, Rackspace or DigitalOcean, that will host the infrastructure for the application.

## ✓ Web development

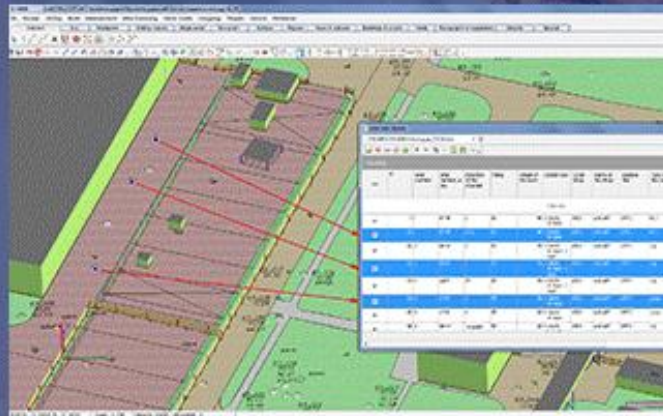

KAI INC has already helped companies in a number of fields, from agribusiness to universities as well as executives to serve their needs.

## ✓ Mobile application

If you want your company to stay on top, you need a mobile application. Android or iOS, we'll build it from the ground up for you

Cloud-based servers

Mineral deposits search and prospecting based on K-MINE

## K-MINE

Software system for geologists, mining engineers, and surveyors

## KAI-SPYT

Web application meant for training, education and knowledge control

## Genplan - 3D

Model of your infrastructure

We proudly present our own graphic-base service 3D Mine, which allows you to work with three-dimensional projects in Perspective and Orthographic Projection Modes.

The system is able to rapidly visualize a large amount of different primitives (dots, segments, triangles, dog-legs, splines) as graphic objects. 3D Mine is absolutely scalable with the ability to add more complex models as needed.

### Features of our service:

- Has SDK to connect with new plugin system written on .Net and C+
- Operates on 32- and 64-bit platforms.
- Allows you to apply a texture-mapping to existing primitives.
- Uses the short term memory and GPU to render objects
- Has tools to visualize raster images in three-dimensional space.
- Has embedded mathematic tools to work with vectors, matrix, segments, lines, triangles and other primitives in 2D and 3D Modes as well as with ground triangulations, basic frames and textures.v
